EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward Keating on 14 September 2004.

The application has been amended as follows:

Claim 12, rewritten as follows:

An image-recording system for a dispensing head with numerous dispensers, in which a predetermined light path from a lighting device to an image-recording device intersects a drop release area of a drop-releasing dispenser to be detected,

characterized in that a deviating device is provided with which a measuring light segment is formed along a predetermined reference line through said drop release area, and that said lighting and image-recording devices are spaced apart from the said reference line relative to said drop releasing dispenser, in which said deviating device has first and second mirrors, said second mirror inclined by a first deviating angle relative to said reference line, said first mirror deflects light from said lighting device into said measuring light segment, and said second mirror deflects light from said measuring light segment to said image-recording device.

Claim 13, cancelled.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose the second mirror, which reflects light from the measuring light segment to the image recording device, inclined by a deviating angle relative to a reference line through which the light path passes through the drop release area.

The Mitani reference does not disclose the second mirror.

The Kadowaki reference discloses three mirrors in fig. 6, however the mirror which reflects light from the measuring light segment to the image recording device (47, 48) is not inclined by a deviating angle relative to a reference line through which the light path passes through the drop release area. In Kadowaki the mirror is parallel to the light path.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
